ACADEMIC ACTIVITIES

August – September 2010 **Scientific Project**, *Development of a hybrid neural network for recognition of material hardness through soundwave analysis*, Department of Physics, K.U.Leuven.
October – June 2009 **Team Project**, *Building and programming a pathfinding robot in team*, K.U.Leuven.

MASTER THESIS

Title *Fresco Reconstruction*
Supervisors Gewoon Hoogleraar Philip Dutré
Benedict J. Brown
Description The object of this thesis is to construct various tools with the goal of aiding and optimizing the workflow of archaeologists trying to restore frescos all over the world. Primarily this means digitally reconstructing the fresco with the aid of specific algorithms, and helping the operator judge the results whilst allowing him/her to suggest new possibilities.
